

RANIT SAMANTA

Finance | Financial Modelling and Analysis | ACCA Student

Kolkata, West Bengal, India • +91 75959 90086 • ranitsamanta74@gmail.com • LinkedIn

PROFESSIONAL SUMMARY

MSc Finance graduate and ACCA student, back in Kolkata after four years in the UK. Most of my experience comes from work I set myself: a three-statement DCF model of Procter & Gamble built from public filings, and an event study on a £3.9bn acquisition. The through line is finding where a set of numbers stops holding together and going after it. Looking for a role in fund accounting, financial analysis or reporting. Available to start immediately.

KEY SKILLS

Three-statement financial modelling • DCF valuation (WACC/CAPM, Gordon Growth, exit multiple, sensitivity analysis) • Event studies and variance analysis • Financial statement analysis and reporting under IFRS • Cash and account reconciliation • Advanced Microsoft Excel (Power Query, pivot models) • Bloomberg Terminal • Python for data analysis • Fund accounting and NAV fundamentals (studied)

KEY PROJECTS

Three-Statement DCF Valuation - Procter & Gamble

Jan 2026 – Mar 2026

Independent project, not employment at P&G.

- Built a fully integrated three-statement model, 607 cross-linked formulas, with the balance sheet tying to zero across every forecast year. Reaching that took tracing each line to source, which is where most of the work was.
- Valued the company by discounted cash flow and stress-tested it, finding roughly 79% of the enterprise value rested on the terminal-value assumptions, and wrote that up rather than leaving the number to speak for itself.

Acquisition Event Study - Informa / UBM (£3.9bn)

Mar 2024

Team project during the MSc. Excel and Bloomberg.

- Analysed one of the largest B2B media mergers: a 30% premium to market, funded and structured as a friendly horizontal deal.
- Built a market model on Bloomberg data (beta 0.747, R-squared 0.467) to measure abnormal returns around the announcement, then tracked two-year performance, which came in 7.9% below the control on a buy-and-hold basis. Strong initial reaction, weaker long-run outcome after COVID hit the events business.

Financial Lead - Live Client Consultancy (MSc, Radiate Wellness)

Sep 2023 – Dec 2023

Team consultancy engagement for a Canadian client. Project, not employment.

- Found the owner's unrelated personal and business expenses booked into the company's accounts, which was inflating reported profitability, and raised it. The team rebuilt its recommendations on corrected figures.

PROFESSIONAL EXPERIENCE

Team Member (Part-time) - KFC, Nottingham, UK

Oct 2022 – Jun 2026

- Balanced the till at the end of every shift for three years and never closed one with a difference I could not explain.
- Held the role part-time throughout a full-time MSc and ACCA papers, working to fixed procedures and deadlines.

EDUCATION AND QUALIFICATIONS

ACCA - Association of Chartered Certified Accountants

In progress

Applied Knowledge complete (Business & Technology, Management Accounting, Financial Accounting). Next paper: Performance Management, December 2026.

MSc Finance - Nottingham Trent University, UK

Sep 2022 – Jul 2024

B.Com Accounting (Honours), First Class - University of Calcutta

2018 – 2021

CERTIFICATIONS

Bloomberg Market Concepts (BMC) • Python for Data Science, AI & Development (IBM) • McKinsey Forward • Citi Job Simulation (Forage). Immediate joiner, based in Kolkata, open to relocating across India.
